

This is totally unjust! The reason why you pay for a service is to get things that "free" services don't offer. So, why should I as a paying XM Radio customer have the services I pay for restricted? There is no reason why except that BIG radio like Clear Channel and Infinity can bully there way around and control other means of broadcasting. Are we going to ban the Weather Channnel next beacuse they offer more than local TV stations? This is America people, we have the right to pay for things others don't offer. Lets keep our freedom and not pass HR 4026. Respectfully, G. Kasprzyk
